

# ATLANTIC CITY

GREEN NEW DEAL SUPERSTUDIO

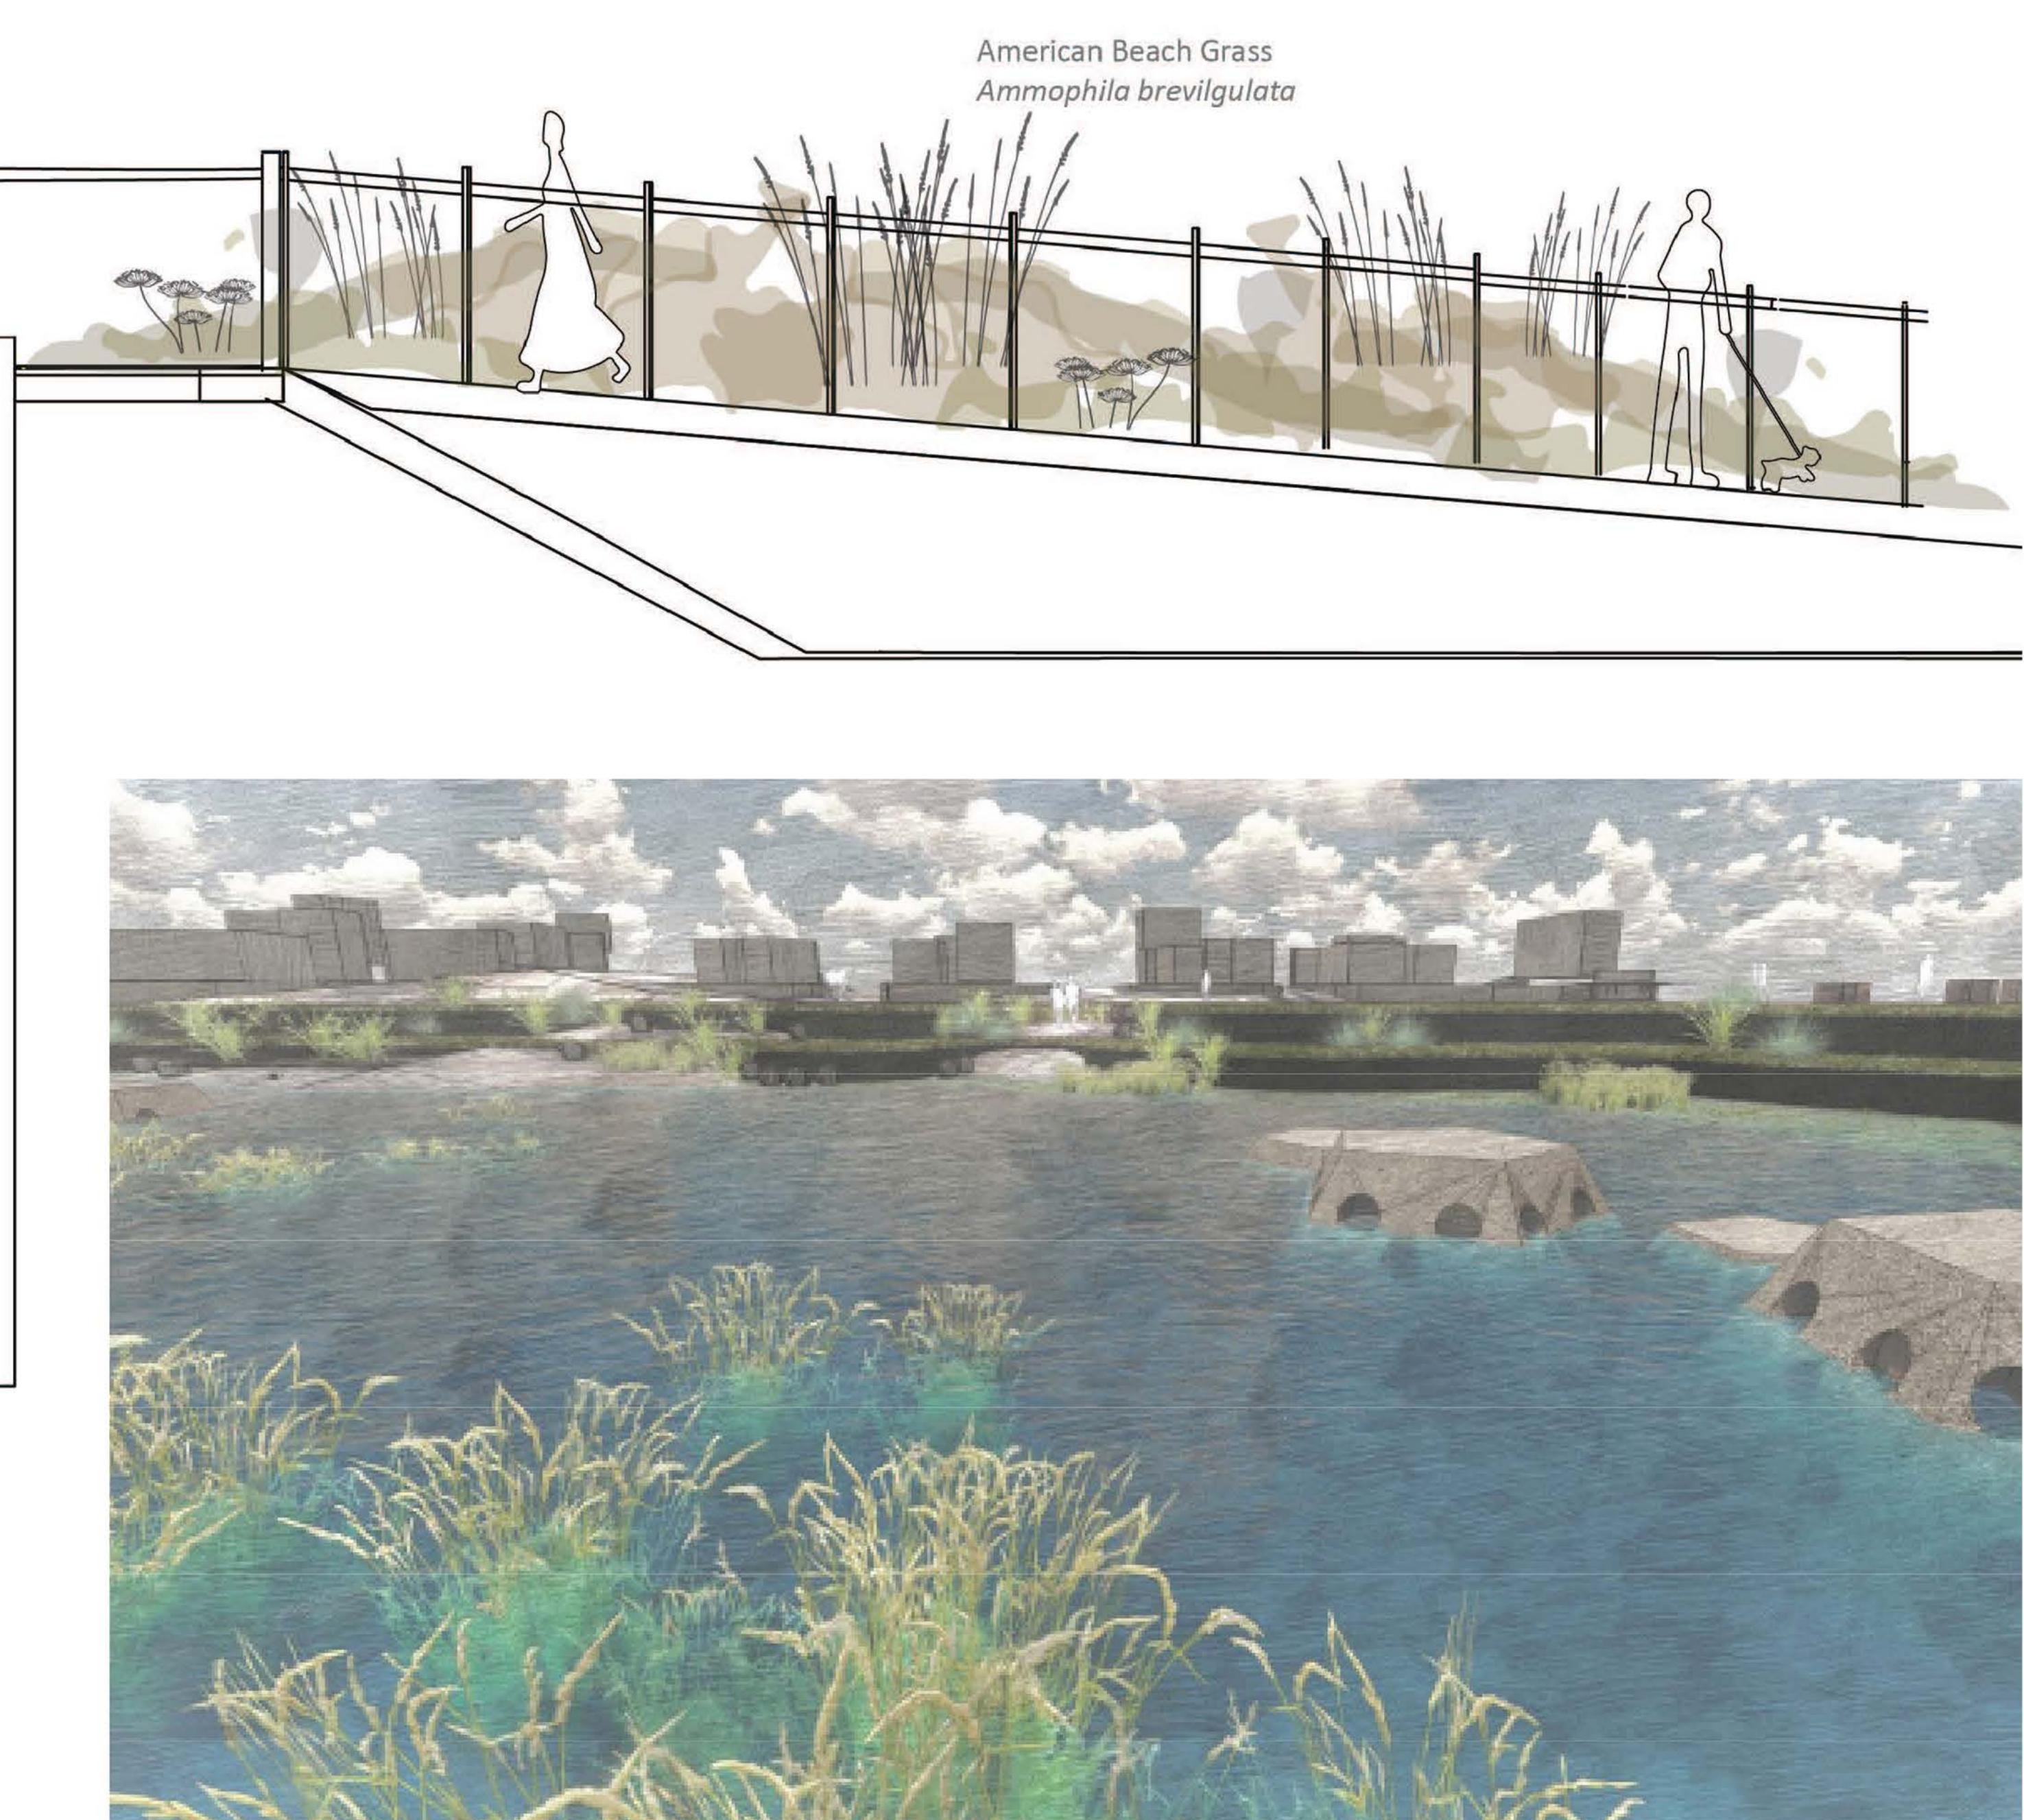

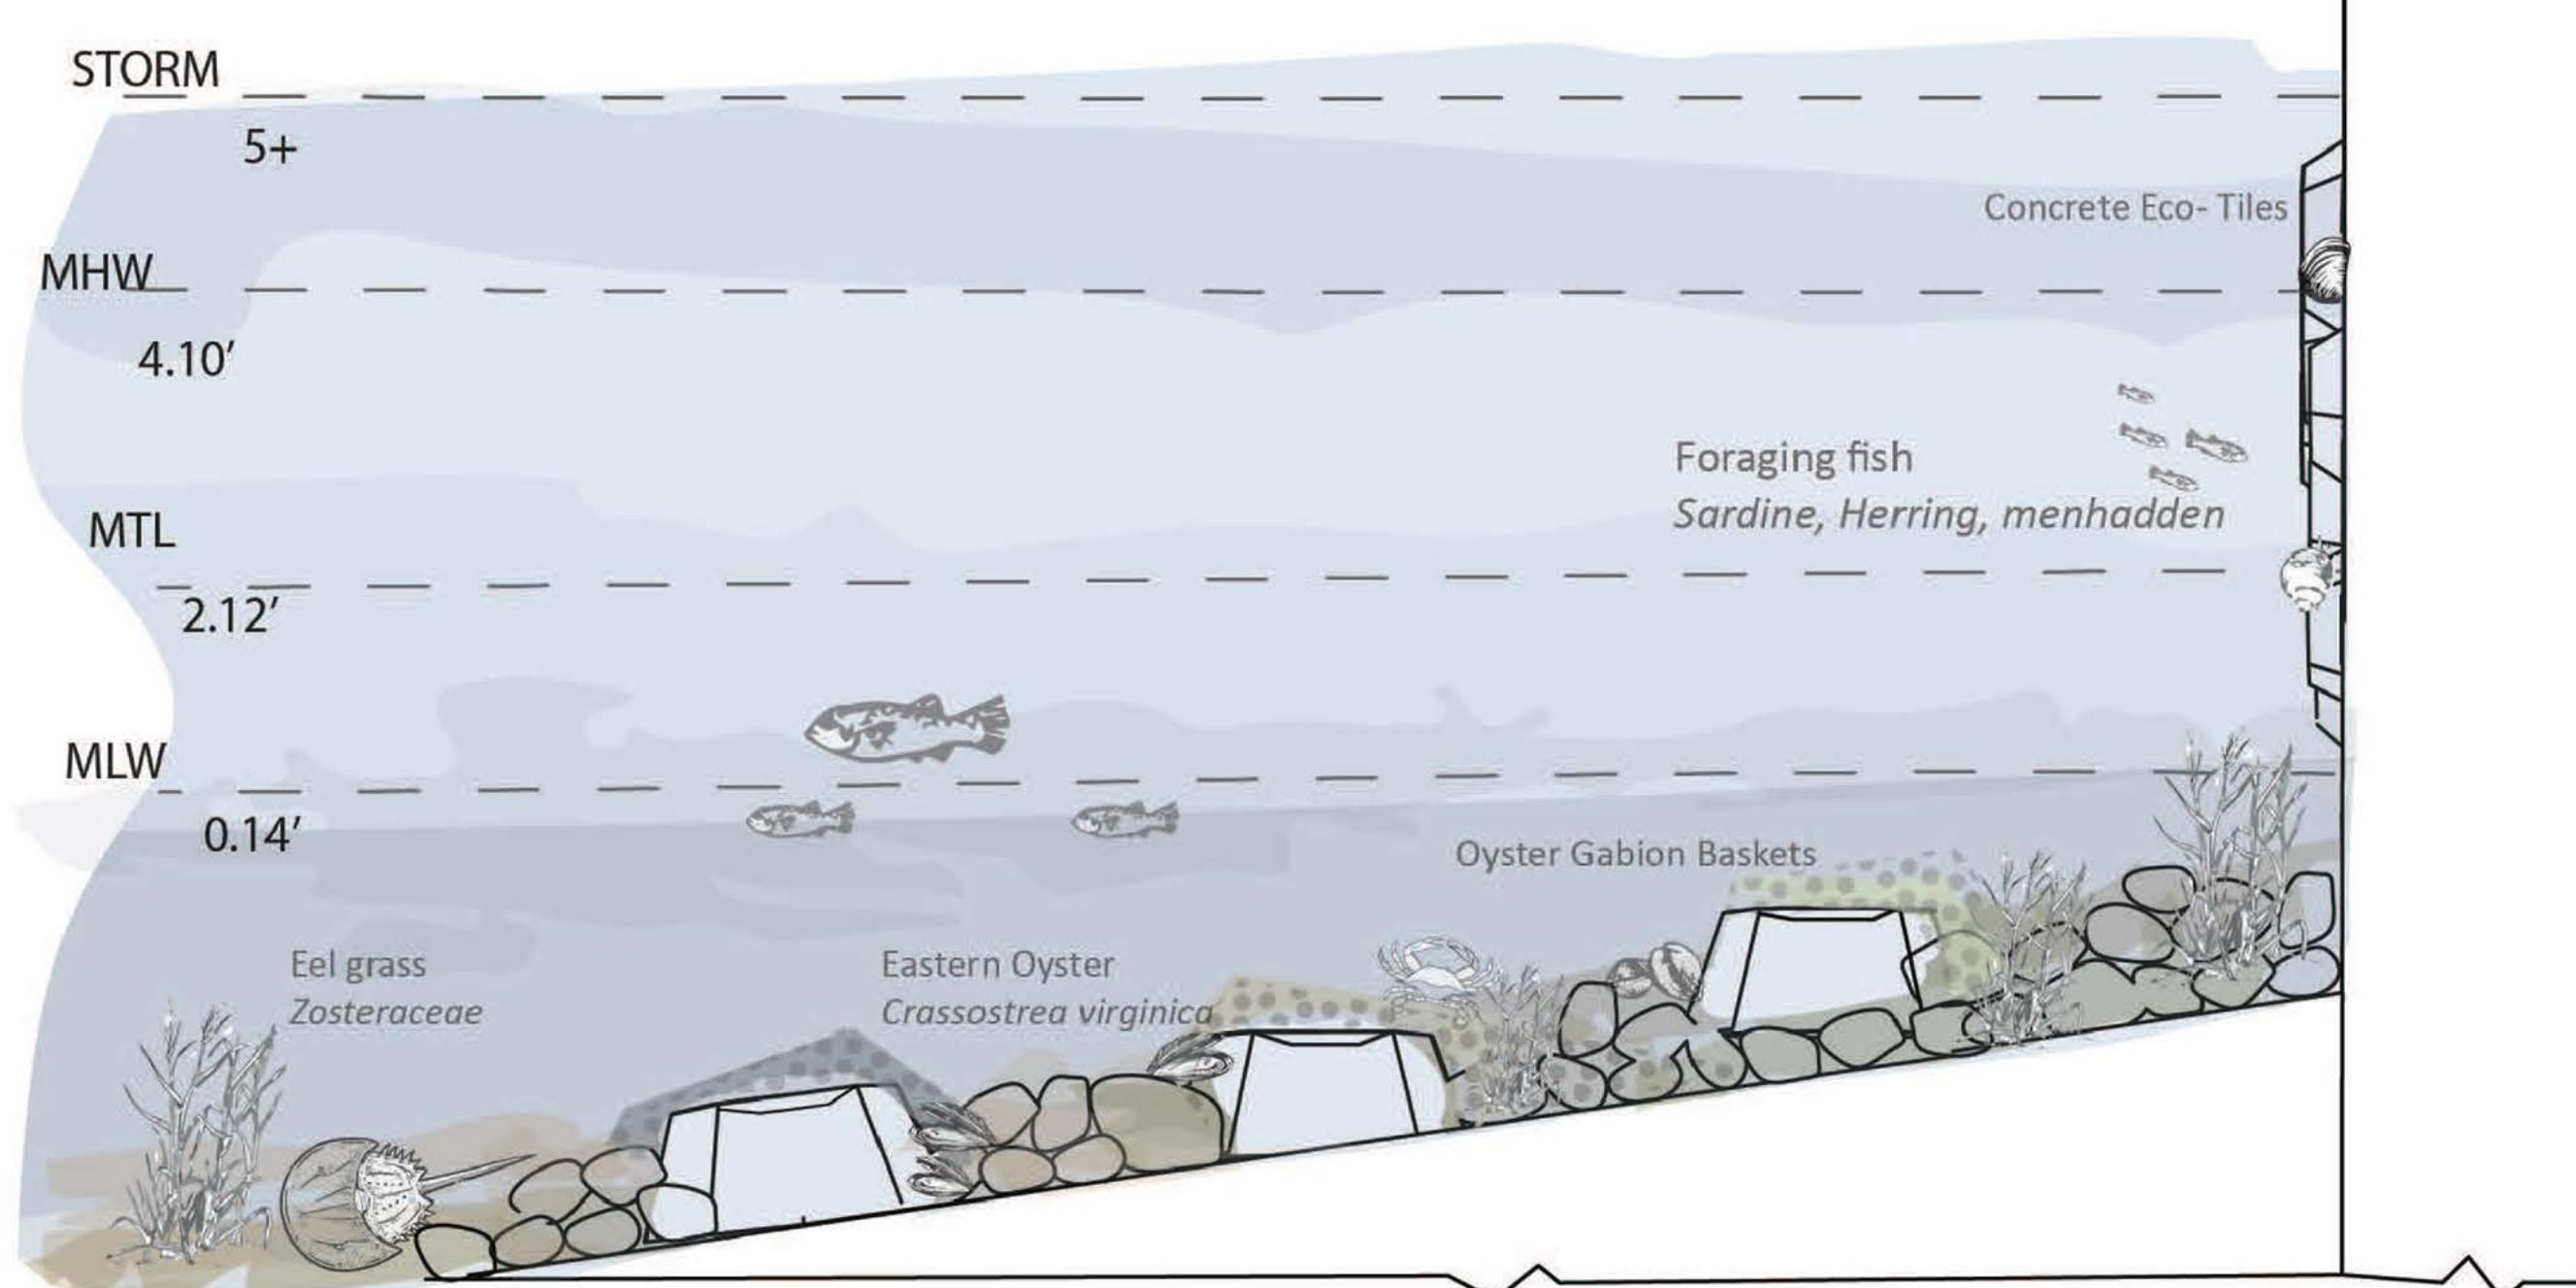

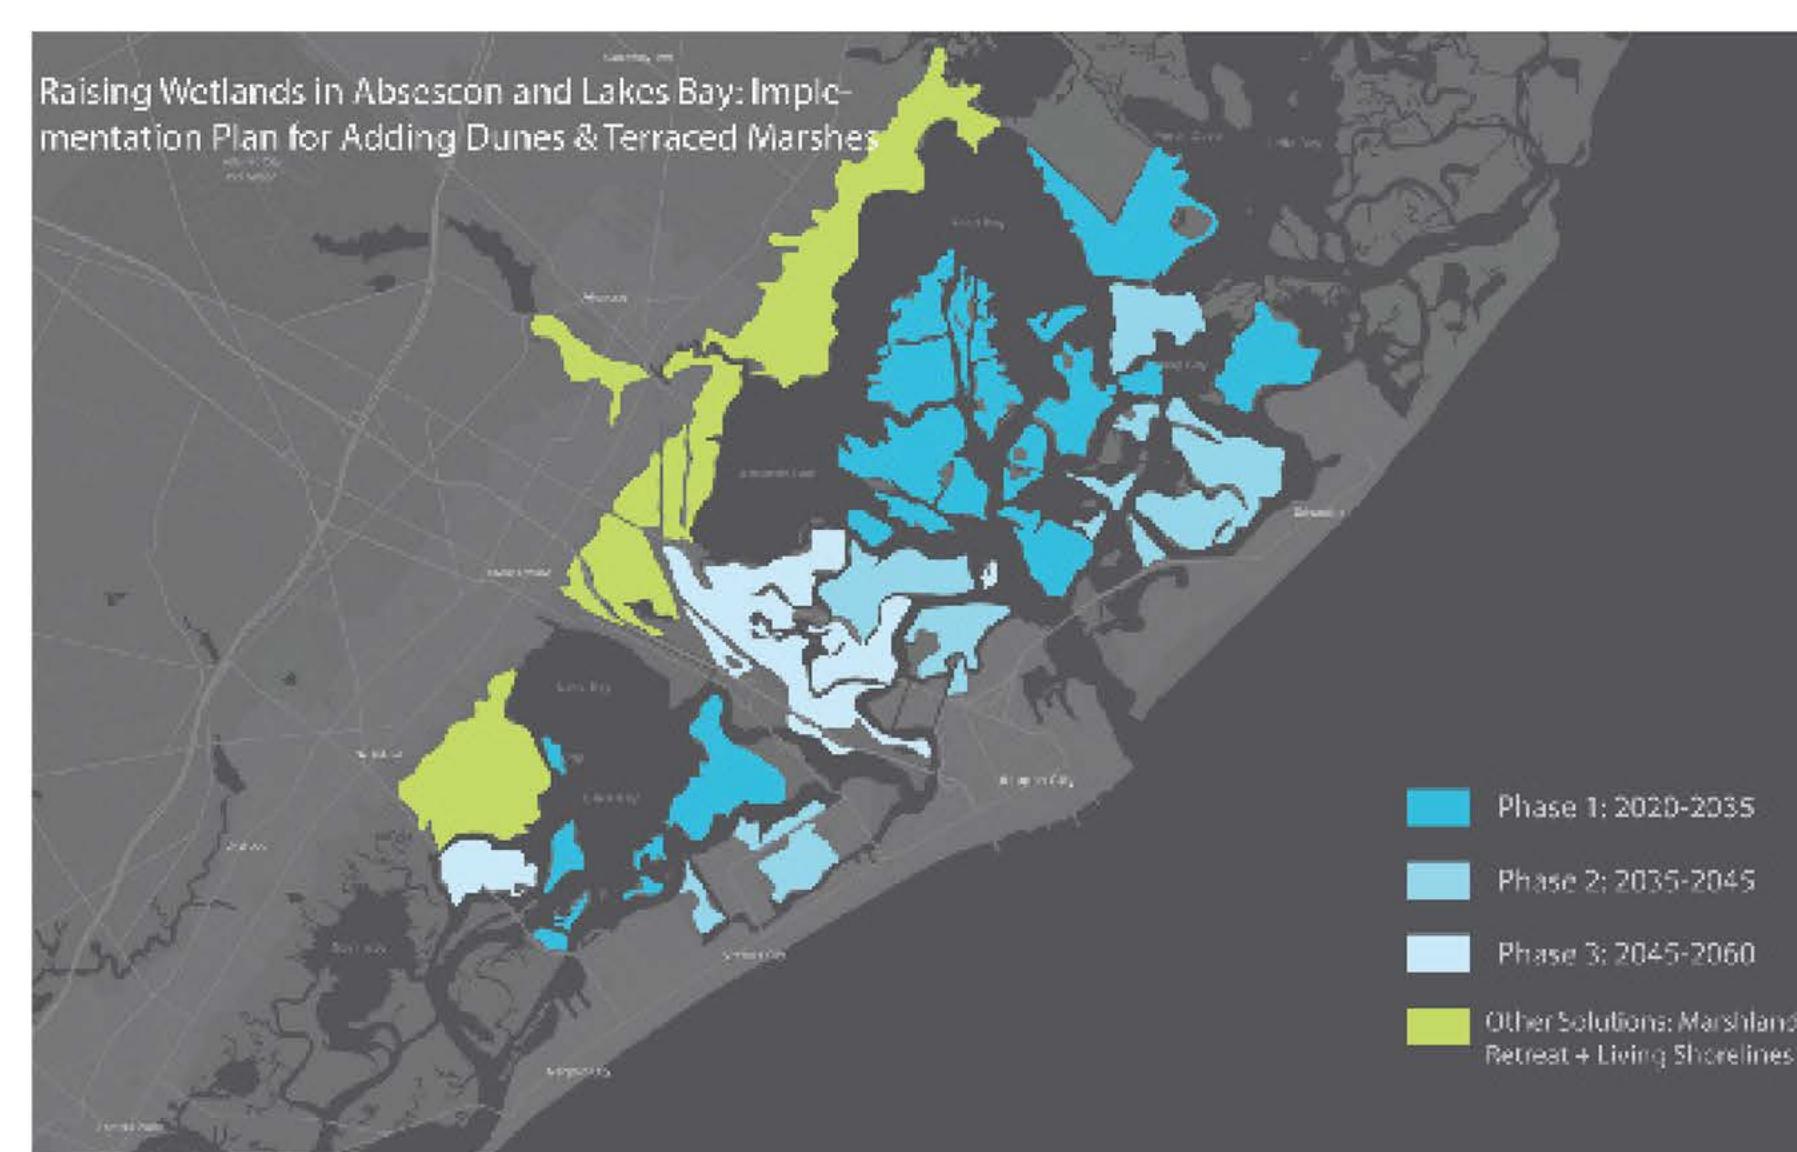

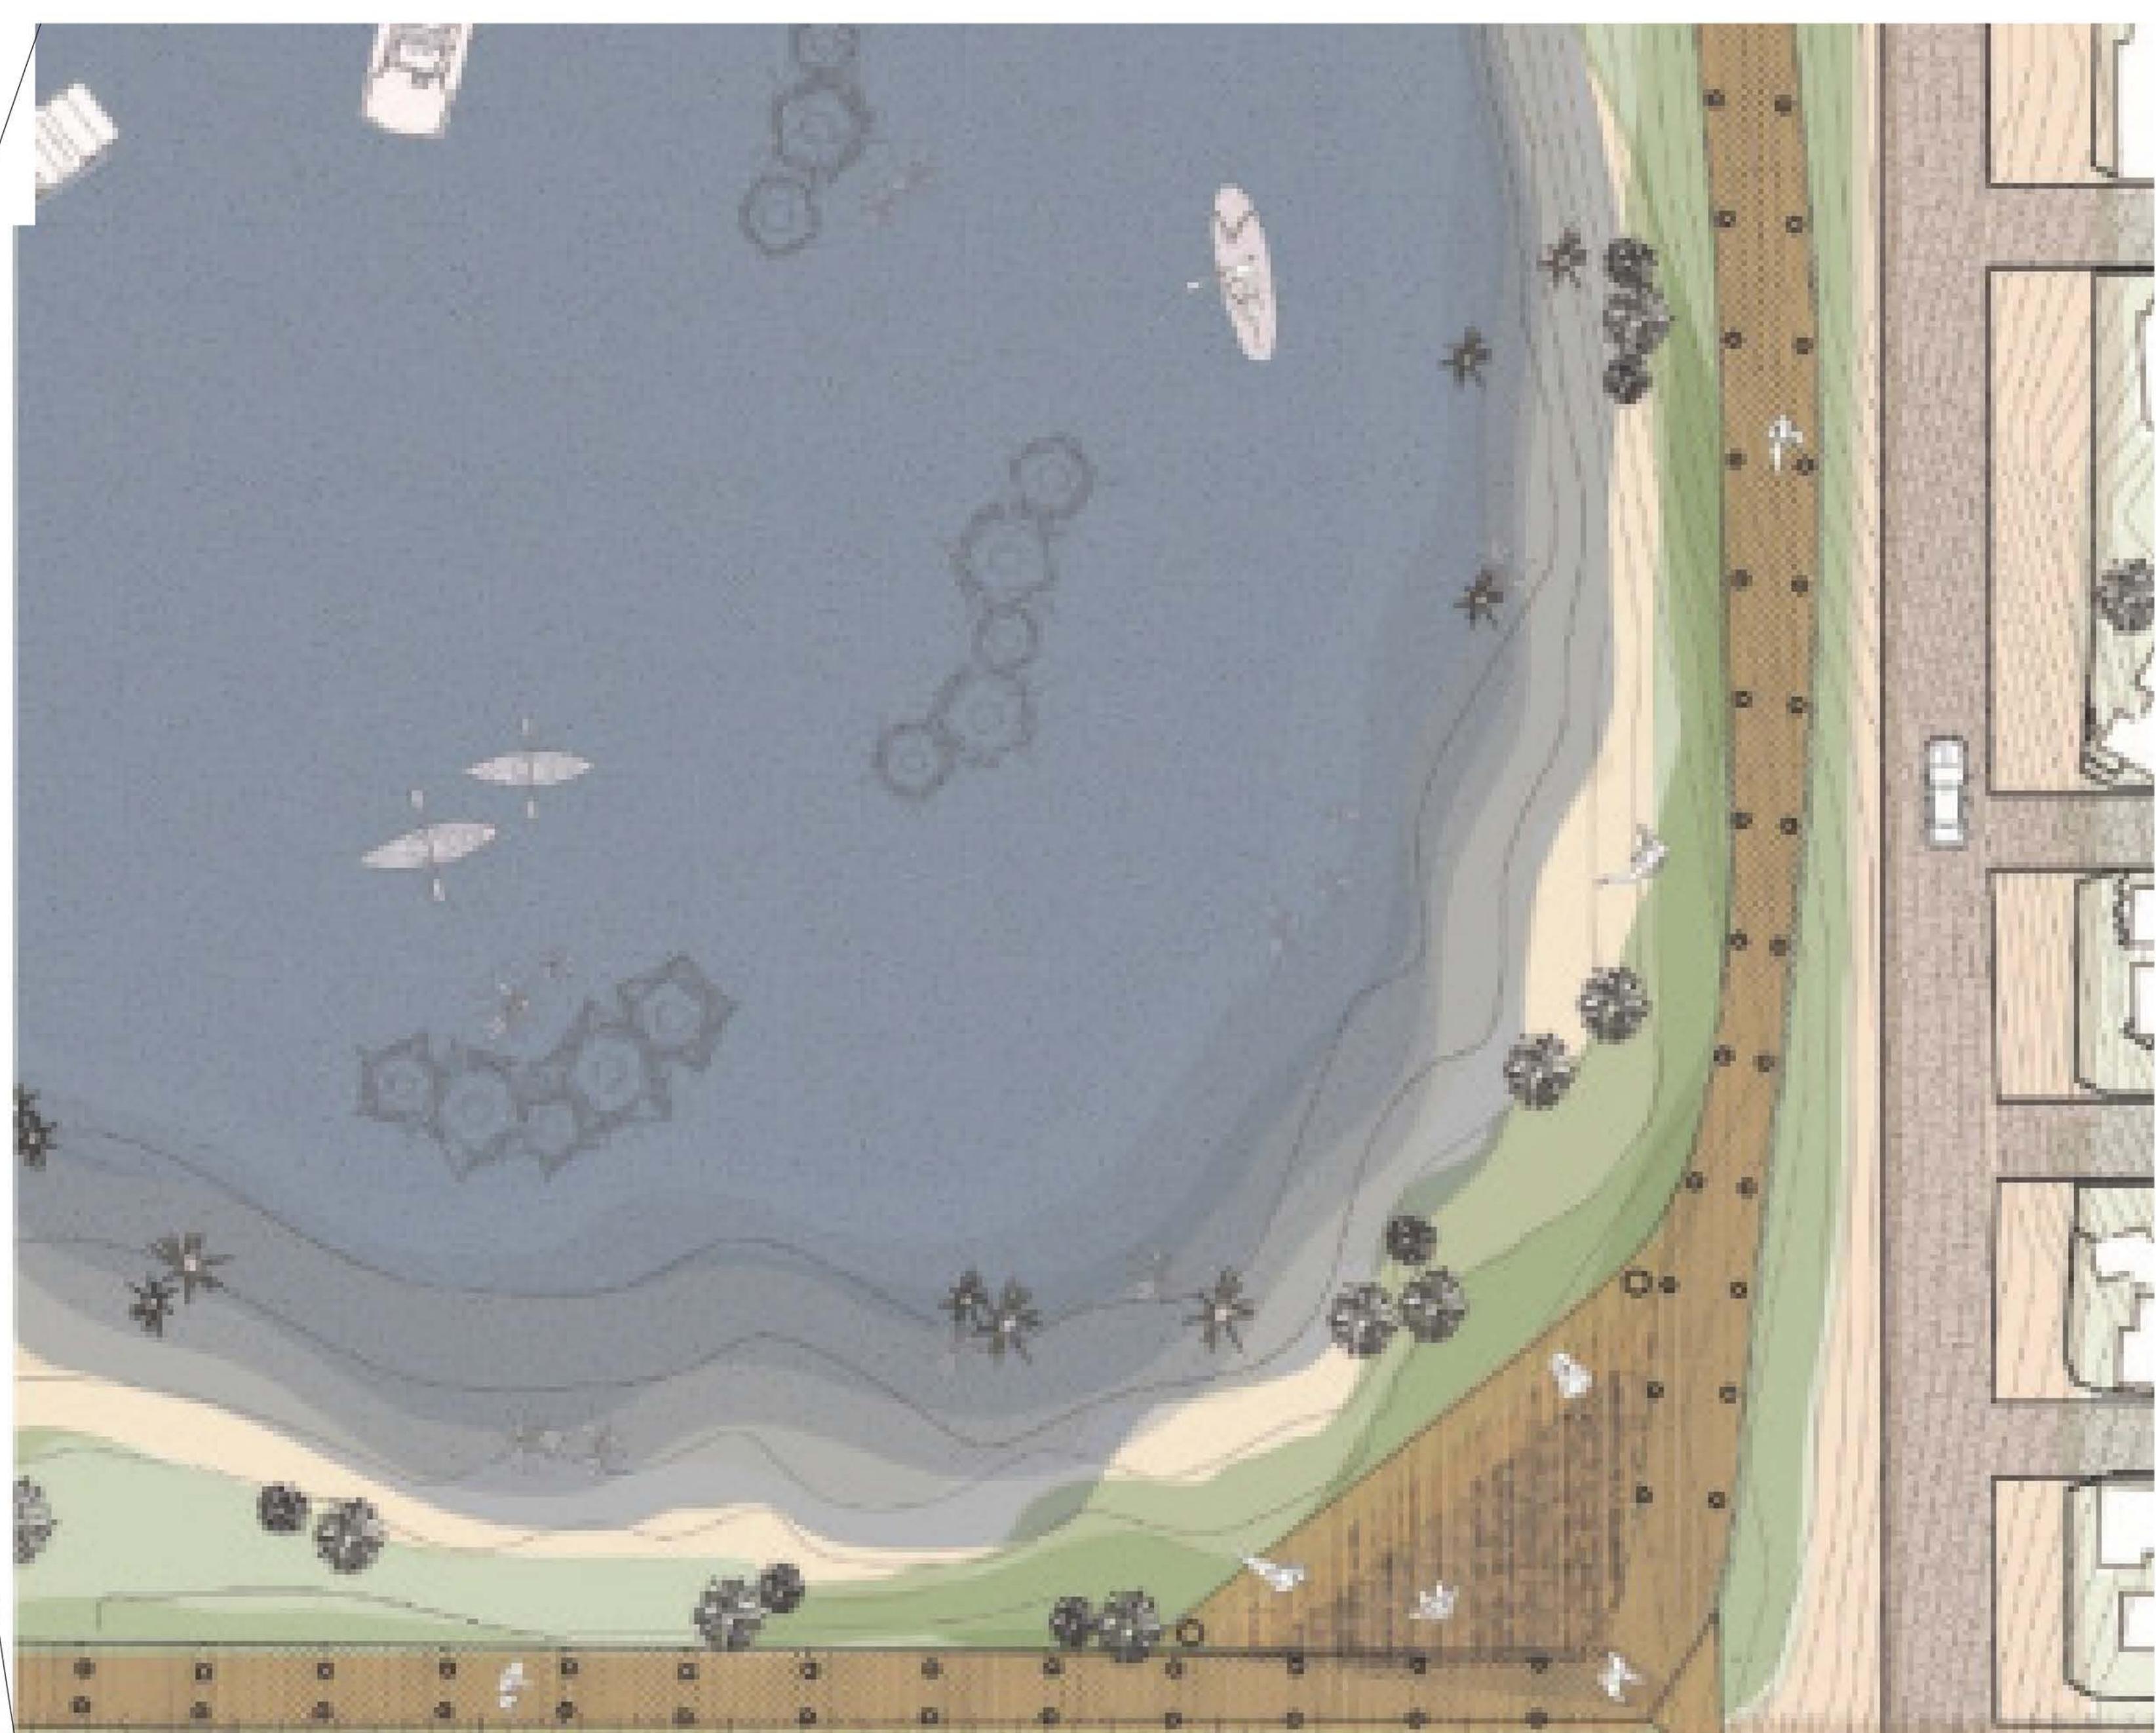

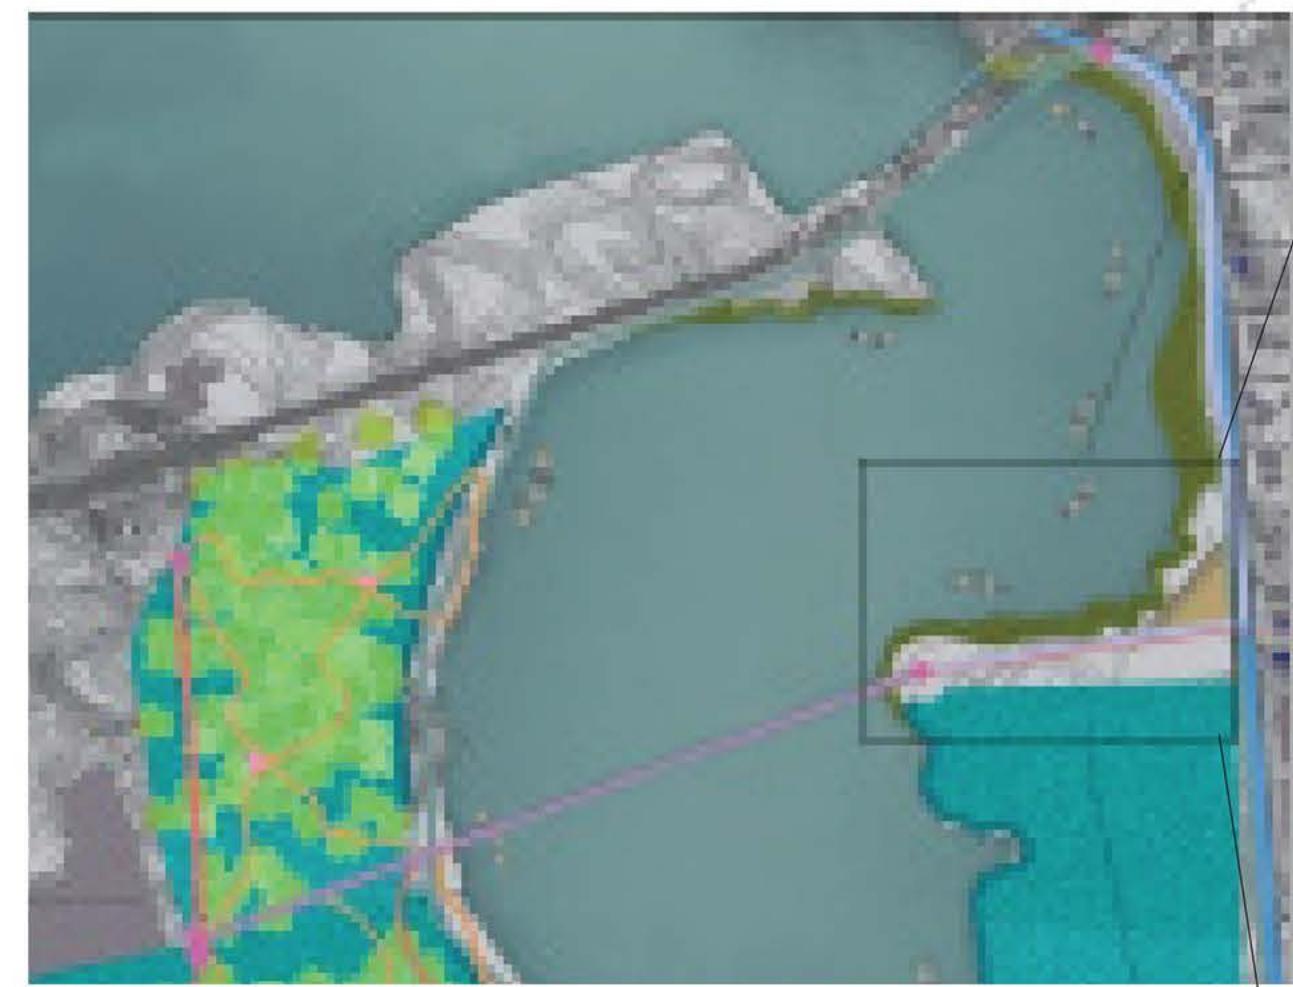

Atlantis "let the water in"

## Connections with the Bay

Because of the impending sea level rise not only will the main Atlantic City island flood but first all of the smaller bay side islands that are home to a large amount of Atlantic county's biodiversity will be lost. So in order to counteract that we build up! With ideas of terraced wetlands, living shorelines, and new infrastructure we're able to save the vital biodiversity of Atlantic City.

### Living Shorelines

### Terraced Marshes
